The complete solution for your electric vehicle

With the popularity of electric vehicles continuing to soar and sustainability becoming increasingly important for your building, a reliable charging infrastructure that can scale with your needs is now more important than ever. With our flexible and needs-based GOLDBECK solution, we will not leave you to face these challenges alone.

You can count on a tailored, fully customisable package designed to meet your needs and those of your users, providing all the essential services for deploying and operating electric charging points efficiently and profitably.

Are you ready to enhance the appeal of your location? Think scalable charging infrastructure, independent pricing and much more besides. We make your building fit for the future!

Legal requirements

It's important to note that you are legally required to comply with the Building Electromobility Infrastructure Act (GEIG) among others. We understand exactly what this means for you, so we are here every step of the way to help you tick the boxes.

New-build non-residential buildings

with 7+ planned parking spaces

Electric vehicle cable infrastructure for at least 1 in 3 parking spaces
At least 1 electric vehicle charging point

New-build residential buildings

with 6+ planned parking spaces

Electric vehicle cable infrastructure for every parking space
No requirements

Charging point maintenance

Standardised payment system for ad-hoc charging for all public charging points in operation since July 2023

Our solution

As we strive to provide you with the perfect solution for your e-mobility needs, we have put together a comprehensive bundle of services ranging from hardware and maintenance through to operation and service. The result is +charge E-Mobility: a bespoke service package that meets all current market and legal requirements.

Hardware & maintenance

Charging infrastructure

- // Cable infrastructure
- // Charging stations and wall boxes
- // Load and charging management
- // Assembly, installation and commissioning

Inspection & maintenance

- // Testing of the residual current device
- // Readjustment of the load management
- // Hardware maintenance

Operation & service

Web-based operator tool

- // Operation of charging points
- // User management
- // Real-time monitoring of charging processes

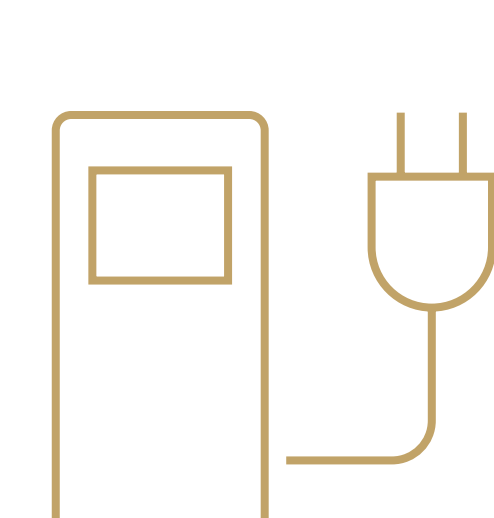

Services

- // Pay-per-use for registered users
- // Ad-hoc charging for non-registered users
- // Payment processing and settlement
- // Customer support
- // 24/7 support including remote troubleshooting
- // Connection to the Hubeject eRoaming network

Your benefits

- ✓ Can be retrofitted and expanded at any time
- ✓ Independent price setting as the economic owner
- ✓ Individual pricing models for various user groups
- ✓ Can be incorporated into existing charging points
- ✓ Minimised downtime and rapid response times
- ✓ Increased location appeal and user friendliness

You've got the space, we've got the charging solution and expertise

From multi-storey car parks and underground car parks through to open parking areas for any property, our comprehensive solution adapts to your individual needs, whether they're for public access or selected user groups. We work with you to develop the perfect service package. After all, we see e-mobility as an integrated concept in any setting – for new-builds and existing buildings alike.

Your fast track to e-mobility.
